Implementing the Single Window

Three enablers provide the means for Partner Government Agencies (PGAs) to participate in ACE

- **Partner Government Agency (PGA) Message Set** - Establishes a single, harmonized set of information to be collected electronically from international traders by CBP on behalf of PGAs
- **Interoperability Web Services** - Provides a system-to-system pipeline for data transfer between CBP and PGAs
- **Document Image System (DIS)** - Allows trade members to supply images of needed documents electronically during the cargo import and export processes

The ACE portal provides PGAs with a graphical user interface (GUI) to view the data in ACE, search on that data and run reports. The ACE portal is a consistent interface across PGAs that differs only by their particular information and processing needs.
